

ROADMAP // 2020-2030  
**VOEDSELVERPAKKING VAN DE TOEKOMST**  
**FOOD PACKAGING OF THE FUTURE**

**ECODESIGN**

Packaging meeting Circular Economy needs. Re-duce, Re-use, Re-cycle, Re-new, Re-design.

**IMPROVED PACKAGING**

Maximized food protection. Packaging for new food, production process and logistic needs.

**SORT**

Packaging allowing 100% sorting.

**RECYCLE**

High quality recycling processes.

**SMART PACKAGING**

Sensor technology. Smart benefits (authentication, traceability, tamper proof).

**IOT - AI**

Digitalization in packaging. Connected packaging.

**B MODEL**

New packaging designs supporting new business models

**LOGISTICS**

Supply chain efficiency. Omni channel packaging.

**Past jouw idee in één van deze concepten?**  
 Dan maken we er graag samen werk van!

**Does your idea fit within one of these concepts?**  
 Let's work it out together!

**LEGISLATION**

Supporting future technologies.

**INTEREST GROUPS**

Building network to support packaging technologies.

**COMMUNICATION**

Increased knowledge and understanding of packaging materials and functions. Creating awareness on new technologies.
