

For PhD students and young researchers planning to attend the European PhD conference:

Contributions to the following topics are welcome:

- 1) Food safety
- 2) Health, quality and nutrition
- 3) Food processing and storage
- 4) Emerging technologies
- 5) Mathematical modelling

When you apply for the PhD conference you should include an **abstract** describing key aspects of your research.

Based on incoming abstracts a number of PhD students or Young Researchers will be asked to give a 20 minute **plenary oral presentation**.

You should also be prepared to make a very short (approximately 3 minutes) oral presentation of your poster for the **poster award competition**.

For Industry delegates:

We would like to encourage you to submit an abstract for a poster presenting your company including current research topics and applications.

Date: 8-10 September 2010

Submission of abstracts and registration:

Please submit your abstract and registration via the conference website

www.BerlinFOOD2010.de

Submission deadline is **30 April 2010**.
The final registration deadline is **31 May 2010**.

Conference venue:

Konrad-Zuse-Zentrum für
Informationstechnik Berlin
Takustrasse 7
D-14195 Berlin, Germany

European PhD Conference in Food Science and Technology

8-10 Sep.
2010

BerlinFOOD2010

Organised by:
Technische Universität Berlin (TUB)
Co-sponsored by:
NovelQ, Integrated Project, no. FOOD-CT-2005-015710; 6th Framework programme, priority 5 Food Quality and Safety

In 2010 the first PhD conference arranged by the **Training & Career Development Network (TCD) of the FP6 project NovelQ** in cooperation with **TUB** will take place.

The objective of the conference is to provide an opportunity for **PhD students** and **Young Researchers** (e.g. postdocs) to meet and to discuss EU research topics in the fields related to food science and technology, food health and nutrition, as well as biotechnological applications in food production.

This conference is also the place where science meets industry, which gives an opportunity for close contact and networking for delegates with related industries working in various fields of food science.

The key objectives of the conference are:

Promotion of young scientists

Stimulation of science-industry exchange

Strengthening of European food science research

Abstract submission

The presenting author should submit the abstract on the official web page. Communications will be made with the presenting author only. Abstract format and guidelines for submission can be found at:

<http://www.BerlinFOOD2010.de>

We are very pleased to introduce invited guests and keynote speakers who will address issues related to History, State of the art and Future aspects of Food Science and Technology.

Keynote speakers:

Brian McKenna

Professor Emeritus of Food Engineering
University College Dublin, Dublin, Ireland

Dietrich Knorr

Professor of Food Biotechnology and Food Process Engineering
Technische Universität Berlin, Berlin, Germany

Volker Heinz

Director of the German Institute of Food Technologies (DIL), Quakenbrück, Germany

Participation in the European PhD conference BerlinFOOD2010 will be free of charge for a chosen number of PhD students. PhD advisors are encouraged to be present.

A maximum of 120 delegates will be able to participate in the conference.

Training and Career Development (TCD) in NovelQ

Young food scientists of the 21st century should possess information and skills to deliver knowledge to industry to be used to develop new or improved products that will expand national, regional and global markets, create employment and benefit society. Through TCD young scientists and technologists shall gain much wider range of skills than simply good laboratory practice.

Conference fee:

| | |
|------------------------------|-------|
| Undergraduate students | 0 € |
| PhD students | 100 € |
| University delegates | 200 € |
| Industry delegates | 400 € |

Lunches and the conference dinner are included. The payment will be due until **30 July 2010**.

Young researcher award:

A limited number of grants is available for travel and accommodation expenses for PhD students or Young Researchers. The authors of the best abstracts will receive grants which include conference fee and additionally costs for travel and accommodation (up to 500 €).

The finalists will be chosen to give an oral presentation which will be judged at the conference.
